Rating:

Having many
.049 engines in
my
collection, and
running /flying
them for 40+
years this is my
most liked and
enjoyed of
all! After first
2oz of fuel
@78-22%
methanol/caster
oil following the
cleaning and
cold run in
process in ops
guide this
engine spins at
19000-19100
rpm with a fine
exhaust
note, that's only
100 rpm
variance!! Using
10% Nitro/20%
lub @50*50
caster/Klotz this
is one sweetly
ported
engine. With this
fuel mix use
two head shims
and you will
have a really
fine 1/2A power
plant that will
draw attention
as it sounds like
a larger

engine.-ENJOY
THIS ONE If
you like 1/2A
engines as
much as I do.
